## EXPERIENCE

### React web3 wallet integration, Portharcourt, Nigeria

—*Frontend engineer* (March 10 - March 14, 2023)

Worked on a responsive website that connects seamlessly to multiple web3 wallets using technologies like ReactJs and tailwindcss.

## PERSONAL AND OPEN-SOURCE PROJECTS

### LENDSQR DASHBOARD – Github

Using ReactJs, I crafted a responsive and engaging user-friendly interface for the company's homepage.

### Creative-Common-Search(open source) – Github

Contributed to this open source project, fixing bugs and adding new features using HTML, CSS, Javascript, and PHP. Demonstrated proficiency in these programming languages, resulting in improved functionality and user experience.

### Github API-Integrated Project Management App - Github

A project management app with Github API integration, modeled after Github Project Board enabling users to create, update, open, and close issues seamlessly within the platform and also enabling users to organize and prioritize tasks in an intuitive, visually appealing manner.

### Scientific Calculator – Github

A fully practical scientific calculator web application that allows users to perform simple and complex calculations.

## SKILLS

**programming**: HTML, CSS, Javascript, Reactjs, NextJs, NodeJs, TypeScript.
**Tools**: Github, Netlify, Vercel, Docker

**Soft skills:** Teamwork, effective communication,

Problem-solving.

## LANGUAGE

English

## Predictive Scraping App (React & NodeJs)

**Predictive-Scraping-App-React-Frontend)**–Github

**Predictive-Scraping-App-NodeJs- Backend)**– Github

 A prediction app using React and NodeJs. The NodeJs backend utilized puppeteer to web scrape data from a website, which was then processed and displayed on the frontend built with React. Conducted calculations to determine the most frequent values and presented them as suggestions to users.Also Auth0 integrated for security measures.

## Netflix Landing Page Clone - Github

 Netflix landing page clone I built with Html, CSS and javascript

**EDUCATION**

**University Of Port Harcourt** — *Physics Electrical & Electronics Engineering*
